PRINCE & CO.,

Linnaan Gardens and Hurscries,

(FOUNDED, 1732.)

FLUSHING, LONG ISLAND, N. Y.

CATALOGUE OF SELECT STRAWBERRIES.

Persons requiring general information on the subject, can address their applications to Wm. R. Prince, who has long made the culture of the Strawberry a specific object of his attention, and will respond with pleasure to the correspondence of Amatrurs.

All orders should be sent direct by mail. The plants, &e., are all labelled and packed in a superior manner. Strawberry Plants can be packed so as to be sent safely at any season. The best periods for planting, are March and April, and August 20th to November. We puddle roots, and do not loose one per cent. Parcels can be sent by Mail, if desired, at 8 cents per lb. If purchasers do not specify, we send by Mail or Express, the latter in preference. No less than a dozen are sold of any variety, unless otherwise stated in the Catalogue. Persons ordering will please specify the Edition of the Catalogue. Terms, Cash with the order, or collected by Express, on delivery.

Our Catalogues of Fruit and Ornamental Trees, Shrubs, Plants, Grapes, Bulbous Roots, Pæonies, Green House Plants, Seeds, &c., will be sent to applicants who enclose stamps. Also, the Wholesale Catalogue for Nurseries.

NOTE .-- All Letters must be plainly headed with Town and State, and be plainly written, accompanied with all necessary directions, &c.

The 200 varieties embraced in our entire collection of STRAWBERRISS, including the newest Foreign Varieties, are fully described in communications from WM. R. PRINCE, in the Patent Office Report for 1861, and in various periodicals. Another elaborate ar icle on the Fragaria Family will be found in the Transactions of the American Pomological Society, for 1862; and one more comprehensive will be found in the Transactions of the American Institute.

We, therefore, deem it only necessary here to describe the New Varieties. The public taste has become so awakened to the appreciation of the sweet, high-Ravored and perfumed varieties of the Strawberry, that such berries as the Wilson, Downer, Austin, Agriculturist, Monitor, Col. Ellsworth, &c., will not be tolerated by persons familiar with good fruit, and the New Varieties presented to us, during the past three years, as Seedlings from the Wilson, very large but sour and insipid, ought to satisfy every amateur, that when desirous of obtaining sweet and fine-flavored Seedlings, we must select the seed from parents possessing these qualities. We now offer a few of our superior New Seedlings with descriptions, and there is not an acid or inferior one among them. Of the following assortment, 35 of the most estimable varieties, designated by an asterisk (*), were originated in our own Nurseries, and selected from thousands of Seedlings. Several of these have white flesh, and there is not one of them that is not superior in flavor to Russell's Prolific, and to all the Seedlings recently announced. The American Varieties possess the advantage of great hardihood and productiveness, and are suitable for field culture. Hermaphrodite Varieties should be grown in rows or hills, but Pistillates may be allowed to cover the entire ground. The latter will require one-tenth of Hermaphrodites to fertilize them, which can be grown in distinct beds, and as these are also fruit-bearing, no space is lost, as has been alleged. If the beds are within 50 feet of each other, the impregnation will be perfected. It is a positive normal fact, based on physical structure, that the Pistillate Varieties of any species of the Strawberry, will produce a crop fifty per cent. greater per acre than the Hermaphrodites can possibly do, as has been fully demonstrated in an article on the Fragaria Family, read before the American Institute, and to be published in their forthcoming Transactions. Any person who ignores the natural existence of Pistillates, furnishes us an evidence of his ignorance of Nature's facts and purposes; and any one who will devote ten minutes to a search in the forest can obtain proof of the fact. In field culture, when planted in rows 2 by 24 feet, it requires 9,000 plants to an acre. H. denotes hermaphrodites-P. pistillates.

We invite all Amateurs to inspect our collection at the fruiting season, it being the most extensive, and at the same time the most select one in our country, and unequalled in Europe, and the only one where all the species of the Strawberry family are assembled. Amateurs can here form a correct judgment as to the average size and productiveness of the Varieties, whereas the exhibitions of selected and often of mixed or misnamed berries are deceptive, and result in disappointments. The precision and accuracy in our gardens is such, that we have offered \$100 if one erroneous plant could be found. We refer to Professor Huntsman, our best-informed Amateur, to John W. Chambers, Esq., Secretary of the American Institute, and to the mass who annually visit our Gardens, as to the great superiority of our collection over all others, and as to its systematic arrangement. We caution the public against such acts as have been practised with the Bartlett and others by giving new names to old varieties; by selling Lennig's White under three names, as if distinct, and also forcing on the public such comparatively poor varieties as will be found named in the Rejected List, annexed hereto.

CHILI STRAWBERRIES.

The peculiar character of this family is the great vigor of the plants, large foliage, and strong petioles and peduncles, all of which are downy or hairy, and flowers often the siz of a dollar; the later ripening of the fuil, after the Piezs; the monstrous and variable size of the berries white flesh, highly perfund, very juicy, sweet and delicious; and, in some varieties, a sprightly, acidulate flavor comminged with the sweetness. They make but few runners, and being therefore scarce, we supply them only to special Amateurs. All these are Hermaphrodite. Note.-There is not one plant of the true Chili varieties for sale by any other

Nursery in the Union, and we shall confine our sales solely to Amateurs.

- Chili Crimson, the original, monstrous, variable form, pleasantly acidulated flavor. For four, \$1.
- 134. Chili Bright Reseate, very large, very high flavor, glossy, deep green foliage. Per pair, \$2
- 135. Chili Bright Orange, yellowish flesh, very sweet, perfumed. Per pair, \$2.
- 136. Chili Rosy Orange, very large, perfumed, exquisite. Per pair, \$1 50.
- 137. Chili Brilliant Rosy, large, round, sweet, and pleasantly acidulated. For four. \$2.
- 138. Chili Monstrous Vermillon, splendid, sweet, aromatic. Per pair, \$2.
- 139. Suprema, orange scarlet, delicate, high flavor. For four, \$1 50.
- 140. Vilmorin, very large, crimson, exquisite flavor. For four, \$1 50.
- 141. Chili Deep Crimson, firm, juicy, sweet, delicious. For four, \$.2

HAUTEOIS STRAWBERRIES.	\$ 0	cts.	\$ 0	N.S.
This class possesses a high misk flavor, for which they are greatly es-				
teemed. It is called, " The Real Amateurs' Strawberry." All				
are Herman brodites, except one Male or Staminete, which should be planted with any that are defective in stamens, in the propor-				
tion of one to ten. All are brownish dull red.				
151. Belle Bordelaise, exceedingly productive, ex-				
cellent flavor, produces an autumnal crop, if irrigated.		35	1	50
152. Bijou des Fraises, conical, the climax of exqui-		00		
site flavor. 153. Nonstrous Mantbols, large, round				
154. Maie Hautbois, very strongly staminate		50	2	60
155. Prolific Mantbois, if irrigated, produces second			-	
crop		85	1	50
EUROPEAN WOOD STRAWBERRIES.	1			
These are all perfect Hermophrodites, the berries are small, with a pe-				
culiar flavor; they are profuse bearers, and mich esteemed.	1

WHOLESALE PRICES-DEDUCTIONS FOR LARGE QUANTITIES.

For 50 plants of any variety, the price will be $2\frac{1}{2}$ times the price named for a dozen.

A Wholesale Catalogue will be sent to Nurseries. By the 1,000 or 10,000, the price for standard varieties, assorted, will be \$4 to \$6 per thousand, or ten per cent. lower than any other advertised prices.

Assortments.-For \$10 we will supply 100 plants each of as many kinds as amount, by this Catalogue's prices, to \$12.

For \$20, we will supply 100"plants each of as many leading kinds as amount, per Catalogue, to \$25.

Any assortments offered by other venders for \$5 and \$10, up to \$50 and \$100, we will supply for the same amount, and will add 10 per cent. in fine plants, gratis, but purchasers can make much better selections from our most-extensive collection.

The permanent rule will be, in regard to this and all other Fruits, to price them as low, and usually much lower, than obtainable elsewhere.

according to the vigor of the different varieties.

REJECTED VARIETIES OF STRAWBERRIES.

PCEONIES-Herbaceous and Tree Varieties.

This magnificent collection comprises over 300 Double flowering Varieties, with a few Single flowering Varieties. They present the most brilliant and gorgeous display of all the flowering plants which adorn our gardens. All the species and varieties are perfectly hardy, and will withstand the winters of Canada. A distinct Descriptive Catalogue will be sent to applicants with very reduced prices.

Chinese Herbaceous Peconics.--OUR SELECTION.-12 fine varieties, \$3; 12 extra fine, more rare, \$4 50; 25 fine varieties, \$5; 25 extra fine, more rare, \$8.

Ditto in Wholesale Assortments for Nurseries at \$16 to \$20 per hundred, for the plentiful varieties, and others at a liberal discount.

Chinese Tree Pæonics, six varieties, our selection for \$8. Several varieties at \$1 each, and the others more rare at \$2, \$3 and \$5 each.

N. B.--Nearly all these are on their own roots, and not grafted, the latter being very inferior in value, a point on which purchasers should be cautious.
